

1. A. Little or No autocorrelation
2. C. Zero
3. A. Hamming Distance
4. B. regression
5. b. Random forest
6. C. Boosting
7. A. Zero
8. C. TVM
9. D. Points
10. B. Mean
11. A. a real number
12. c. feature selection
13. B. regression
14. C. time series
15. B. logistic regression
16. C. parameters of ML algorithm (model Variables)
17. A. True
18. C. Along diagonal
19. B. $TP / (TP + FN)$
20. C. Margin points

21. Supervised learning is an algorithm that the labels data trans for model for prediction data. Supervised learning have KNN, linear regression ~~and~~ SVM.

23. Regression analysis is used to predicted continuous values.

31. k in k -means algorithm is positive integer.

25. List out any two major applications of data science.

- ~~Video recognition~~ Credit rating (in KNN)
- Self-driving cars ~~can~~

24. Elucidate any two challeges of Machine Learning

+ ~~SVM is algorithm to divides a dataset of~~

- k -mean clusering is algorithms to divided a dataset of k cluser by similitiy that it is un supervised algorithm

- reinforcement algorithm is infraction of enviroment. Example game go ~~chees~~ and self-driving cars.

26. - Structured data is well organized data in which can be easier understand by kernal
- semi structured data is low-organized data in which can be hard understand by ~~kernal~~ human like. CSV & ML.

28. Data preprocessing is the process before applying the data. ML algorithms. There many step such as data - cleasing data transform data.

22. model ML is bad because it only 30% of accuracy between data that have provide. ~~it~~ 99% of the accuracy.

35. Kernel work in SVM is called kernel trick.

27. outlier in Data is find Data that different the population data. Ex. Age: 13, 24, 30, 200, 40

So. Age. 200 is different of the population.

34. on the performace of the classifiers the linear boundarie identified is shown. let's know the data that near line is it the accuracy for training data is good.

32. hyperparameters of machine Learning algorithms
is ML algorithms try to optimize model Variables.
